Welcome to RGBHosting!

RGBHosting was created to provide personalized hosting plans to cater specifically to individual customers and their needs. If one of my pre-defined hosting plans doesn't work for you contact me and tell me what you need and how much you want to pay. I'll set up a custom plan just for you!

Please look around and view all of the hosting plans available. If you have any questions please feel free to submit a ticket from the Support Center and I will get back with you as soon as possible.

Our Support Center is also a great place to learn about hosting and other related topics. You can find information on billing, our hosting plans, and even extra features that are available here at RGBHosting.

If you are going to purchase a hosting plan I highly suggest you go to the Troubleshooter in the Support Center and go through the "Ordering a Hosting Package" walkthrough before you begin.
